

MUHAMMAD ARYAN AFZAL

WEB DESIGNER | UI/UX | FRONTEND DEVELOPER

Taxila, Punjab, Pakistan | +92 366-2372537 | maryan3604@gmail.com | [LinkedIn](#)

PROFESSIONAL PROFILE

Web Designer and Frontend Developer with 2+ years of hands-on experience designing and building responsive web interfaces, portals, landing-style experiences, and product workflows. Strong at translating requirements, rough concepts, and Figma/UI ideas into clean, structured, implementation-ready interfaces. Experienced with React.js, Next.js, HTML5, CSS3, JavaScript, TypeScript, Tailwind CSS, Bootstrap, Figma, Supabase, and responsive design. Built real-world digital products including an enterprise forms portal for Engro Fertilizers, the ACM CUI Wah web platform, and the AutoGrade AI evaluation system. Combines visual hierarchy and usability with practical developer handoff and full-stack awareness.

WEB DESIGN & UI CAPABILITIES

UI / Web Design	Figma, responsive layouts, visual hierarchy, typography, spacing, component-based design, UI consistency
Landing & Marketing Pages	Structured one-pagers, clear information hierarchy, CTA-focused sections, conversion-minded layouts
Frontend Implementation	React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap
Design-to-Code	Figma-to-React implementation, reusable components, responsive behavior, cross-browser compatibility
Developer Handoff	Organized assets, structured components, implementation-aware specifications, Git/GitHub workflows
Product & UX	User-centric flows, forms, dashboards, portals, information architecture, usability-focused interfaces

PROFESSIONAL EXPERIENCE

IT Support & Software Engineering Intern

Engro Fertilizers Ltd. — Daharki

Jul 2026 – Aug 2026

- Designed and digitized legacy paper-based workflows into structured, responsive electronic forms using HTML and CSS for internal enterprise use.
- Developed the **EngroFormsPortal**, a central web portal organizing employee and operational workflows into a consistent, easy-to-navigate interface.
- Created multi-step form experiences including employee eDirectory registration and Material Gate Pass review/signature workflows, with clear hierarchy and role-based navigation.
- Translated operational requirements into practical web interfaces and implementation-ready pages while working in an enterprise environment.
- Used Jira for enterprise ticket lifecycles and gained practical exposure to troubleshooting, networking, security, and production IT environments.

Frontend Developer Intern

ACM CUI Wah Chapter

Jun 2025 – Aug 2025

- Built responsive, user-centric interfaces for the official ACM CUI Wah web platform using React.js.
- Translated Figma/UI concepts into reusable, cross-browser compatible components and responsive page layouts.
- Integrated Supabase real-time database endpoints and designed frontend states around dynamic content and user interactions.
- Collaborated in an Agile/Git-based development workflow, balancing visual consistency with practical implementation constraints.

AI/ML Intern

Codeifyy Solutions (Pvt.) Ltd. — R&D;

Jul 2026 – Aug 2026

- Engineered Python-based machine learning pipelines, including preprocessing, feature extraction, model evaluation, and iterative performance tracking.
- Collaborated with senior technical staff on research workflows, validation, and technical documentation.

SELECTED WEB & PRODUCT PROJECTS

EngroFormsPortal — Enterprise Web Forms & Workflow Portal

Engro Fertilizers Ltd.

2026

- Designed and implemented a centralized portal to replace fragmented paper/manual workflows with organized digital forms.
- Created a clean navigation structure with a central hub and dedicated workflow area for employee and operational services.
- Implemented pages for employee eDirectory registration, Material Gate Pass requisition, GM review/signature, Security review, and other internal service workflows.
- Focused on usability, consistent page structure, responsive presentation, clear form grouping, and straightforward enterprise navigation.
- Prepared the project as a deployable static web package with organized assets and a clear folder structure for handoff.

ACM CUI Wah Portal — Responsive Society Web Platform

ACM CUI Wah Chapter

2025

- Contributed to the official ACM CUI Wah web platform, building responsive frontend interfaces with React.js.
- Converted design concepts and Figma layouts into functional web components with reusable structure and responsive behavior.
- Worked with frontend/backend project organization and Supabase-backed dynamic content.
- The public project repository contains dedicated **frontend** and **design** areas, supporting an implementation-oriented design workflow.

AutoGrade — AI Handwritten Exam Evaluation Platform

Academic / Independent Project

Jan 2026 – Present

- Designed a full-stack web experience for uploading handwritten exam papers, processing OCR output, and presenting question-wise evaluation results.
- Built the responsive Next.js frontend and integrated it with NestJS services and PostgreSQL-backed workflows.
- Designed information-heavy interfaces for OCR results, question segmentation, grading, and evaluation feedback while keeping the user flow structured.
- Combined UI development with AI/OCR understanding to make document-processing workflows easier to navigate.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

COMSATS University Islamabad, Wah Campus

Apr 2021 – Present

- CGPA: 3.52 / 4.0
- Relevant coursework: Software Engineering, Artificial Intelligence, Database Systems, Data Structures & Algorithms, Computer Networks, Operating Systems, Object-Oriented Programming.

LEADERSHIP & RECOGNITION

- **Executive Member — Code Hub, ACM Society CUI Wah:** Organized and facilitated hackathons, coding workshops, and technical bootcamps for 100+ students (May 2024 – Present).
- **Merit Laptop Scheme Awardee:** Recognized for academic performance and GPA standing at COMSATS University Islamabad (2023).
- **Runner-Up — HRCA Inter-Institutional Programming Contest:** Engro College Daharki (May 2020).
- **ACM Codezaar Competition:** Part of the ACM CUI Wah team that placed 5th among 16 universities in the team competition.

CERTIFICATIONS

- Prompt Engineering for AI Systems — Coursera
- Data Structures & OOP with C++ — Coursera Specialization

PORTFOLIO & PROJECT EVIDENCE

- **LinkedIn:** [linkedin.com/in/MuhammadAryanAfzal](https://www.linkedin.com/in/MuhammadAryanAfzal)
- **ACM CUI Wah Web Project:** github.com/ACM-CUI-Wah/ACM-CUI-Web
- **Featured work:** EngroFormsPortal, ACM CUI Wah Portal, AutoGrade — detailed project cases available for review.

MINDRIFT / TENDEM ROLE ALIGNMENT

Marketing & Landing Experiences	Experience structuring clear, polished web pages, portals, and product flows around user goals.
Figma & Responsive UI	Experience translating Figma/UI concepts into responsive React interfaces and reusable components.
Visual Consistency	Strong focus on spacing, hierarchy, typography, navigation, and consistent page structures across multi-page systems.
Implementation-Ready Design	Frontend engineering background enables designs to be structured realistically for developers and no-code implementation.
Independent Delivery	Experience taking projects from requirements and UI structure through implementation, testing, organization, and handoff.
English / Communication	Professional English communication through technical documentation, presentations, teamwork, and enterprise project coordination.

TECHNICAL TOOLKIT

Design: Figma, UI Design, Responsive Web Design, Design Systems, Visual Hierarchy, Typography, Prototyping, Asset Preparation

Frontend: React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend/Data: Node.js, NestJS, Django, REST APIs, Supabase, PostgreSQL, MySQL, MongoDB

Tools: Git, GitHub, Jira, VS Code, Linux/Unix

PROFESSIONAL POSITIONING

Target role: **Web Designer / UI Designer / Frontend Web Designer**. Available for part-time remote freelance work and project-based assignments. Primary strengths are responsive web design, Figma-to-code execution, frontend implementation, enterprise portals, product interfaces, and visually consistent digital experiences.
